Attorney Docket No. 000487.00042

Remarks

The abstract has been amended as requested by the U.S. Patent and Trademark Office.

Clams 2, 4, 5, 8, and 11 were rejected as not enabled for prevention of cancer.

Prevention has been deleted from the claims.

Claims 2, 4, 5, 8, and 11 were rejected as unclear in the expression of an oxygenated

derivative. This expression has been deleted.

Claims 2, 4, 5, and 8 are rejected as obvious over Cohen in view of Squires. Claim

11, dependent on base claim 2, was deemed free of the prior art. The recitation of claim 11

was inserted into base claim 2. Therefore, claim 2 and its remaining dependents should also

now be free of the prior art.

All rejections and objections have been addressed. Please withdraw all rejections and

objections and process the application for allowance. Please rejoin the restricted and

reconsider the withdrawn claims.

Respectfully submitted,

Date: September 30, 2009
